The Avicado Effect in Healthcare:

Transforming Insights Into Actionable Results

DUKE HEALTH

Project Brief

Avicado provided consulting services to review Duke Health's current business processes in order to recommend enhancements and efficiencies to how their Engineering + Operations team plans, manages, and executes their construction portfolio. Leveraging our technical expertise to automate critical processes with their ERP system ensured a fully integrated and lasting solution.

Highlights

- ✅ Approx. 320 active projects and 40-50 impacted stakeholders

- ✅ Developed and implemented a new budget template and process

- ✅ Identified key business processes to automate, design and implement

- ✅ Key focus of business process improvements included: budget approvals, budget changes, purchase orders, change order process, project close-out, project manager update and estimate approvals

MEMORIAL HEALTHCARE SYSTEMS

Highlights

- ✅ PMIS process improvements and ongoing managed services to support users across construction, facilities, procurement and more

- ✅ Designed, developed and implemented a robust integration between the PMIS and Workday. Included both transactional and non-transactional data with both one-way and two-way integrations

- ✅ Ensured a thoughtful implementation plan was developed and communicated to impacted users

TAMPA GENERAL HOSPITAL

Highlights

- ✅ Migrated 767 projects from e-Builder to Procore including 722 historical and 45 active projects

- ✅ Worked alongside Procore's implementation team, minimizing PMIS downtime through migration to maximum of three days

- ✅ Designed and built a custom bi-directional folder and documentation integration between Procore and SharePoint
